Approved by the World Agricultural Outlook Board. Summary released October 17, 2002. The next *Fruit and Tree Nuts Outlook* newsletter is scheduled for release on November 21, 2002. Summaries and text of Situation and Outlook reports may be accessed electronically via the ERS website at [www.ers.usda.gov](http://www.ers.usda.gov)

The *Fruit and Tree Nuts Situation and Outlook Report* was replaced with a bi-monthly electronic newsletter titled *Fruit and Tree Nuts Outlook*. The first issue was released on September 24, 2001. The Outlook will continue to be supplemented by a Yearbook (October).

---

## Summary

### Fruit Production Down but Tree Nut Crop Up in 2001

The 2001 fruit and tree nut crop declined 8 percent from the previous year as a result of smaller fruit crops. Nut production, on the other hand, climbed 20 percent. Declining bearing acreage and lower yields attributed to a 6-percent decline in citrus production and an 11-percent decline in noncitrus production. Weather factors, such as drought in Florida, and below-average rainfall, heavy winds, and hail in Washington contributed to the decline. Only the production of cultivated blueberries, raspberries, sweet and tart cherries, dates, nectarines, olives, pears, Hawaiian pineapples, and lemons were higher than in 2000.

Substantial declines among the major crops, such as apples and grapes, helped lead the overall decline in fruit production. Apple production declined 10 percent between 2000 and 2001 and grape production fell 15 percent. In 2000, however, a record-large grape crop was produced, and the smaller 2001 crop is still bigger than any other crop except those produced in 1982 and 1997. Production of all type grapes was down in California, including the wine varieties that had been growing steadily over the previous few years. Production also declined in New York and fell sharply, by 67 percent, in Michigan. Washington grape production increased for both its wine and juice grapes.

The orange and tangelo crops experienced the smallest decline among citrus fruit. Orange production was down in Florida, California, and Arizona, but increased in Texas as a result of favorable weather conditions increasing yields. Lime production saw the most drastic decline, falling 58 percent to the lowest level since 1995. It is unlikely under present conditions that lime production will recover to even the modest levels of the past few years because growers cannot replant trees in areas where they had been removed due to citrus canker. Since there is only a limited area in southern Florida that is appropriate for lime production, and competition is heavy in this area from developers and vegetable growers, the U.S. lime industry will likely remain at its present level in the foreseeable future.

Nut production increased mostly as a result of the alternate-bearing nature of the trees. Production was on the “on-cycle” in 2001 for almonds, hazelnuts, macadamia nuts, pecans, and walnuts. Only pistachio

trees were on the off-cycle and produced a smaller crop. The almond crop continued to set another record in 2001, driving the overall increase in production. With almonds accounting for 61 percent of the nut crop, the 18 percent bigger crop helped push total production up 20 percent. Walnut and hazelnut trees also produced record crops, and their production rose 28 percent and 119 percent. Pistachio production declined 28 percent from its record crop in 2000, however, the 2001 crop was the second largest reported.

The value of the 2001 fruit and tree nut crop declined 2 percent from the previous year to \$11.7 billion. Despite higher prices for most noncitrus fruit crops, their crop value rose only 1 percent as the smaller crop size outweighed price gains. The value of the citrus crop fell 8 percent. Despite smaller crops in 2001, the unit prices of oranges and grapefruit were down due to lower prices received by Florida growers. Although California and Arizona growers received higher prices for their oranges, the substantially larger Florida crop brought down overall prices. The value of the tree nut crop rose only fractionally as the larger crops brought down prices, with substantial declines in the unit price of hazelnuts and pecans.

### Bearing Acreage Second Highest on Record

The total number of fruit and tree nut bearing acres declined fractionally in 2001 from 2000, however, it was the second highest on record. Bearing acreage declined for both citrus and noncitrus crops. Tree nut bearing acreage, however, increased 4 percent.

In response to lower prices due to strong domestic production in recent years and from international competition, growers have been reducing bearing acreage for many fruit. With the continuously low returns to growers of apples and grapefruit, there has been a steady decline in their acreage since 1998. For apple production, however, as a result of the rapid expansion in the nineties, the 2001 level is still higher than throughout the eighties, even with the continuous decline over the last 4 years. With the recent fall in apple production accompanied by higher grower prices, the continued decline might slow or even stop. The long-standing pressure on grapefruit growers to meet costs as a result of low prices has driven grapefruit bearing acreage to the lowest level since 1992. For grapefruit growers, however, the pressure continues

to grow as prices continue to decline even with lower production, and growers are likely to continue to reduce the number of acres of grapefruit trees. Sweet cherry growers in California and Washington, on the other hand, have continuously been increasing the number of bearing acres since 1992. They have been planting more acreage in response to strong demand from the domestic market and continuously growing international markets. Bearing acreage also increased for oranges, lemons, nectarines, and papayas.

Bearing acreage increased for all tree nuts except hazelnuts in 2001 (bearing acreage data are not available for pecans). The number of acres producing macadamia nuts increased for the first time in 3 years. Almond and walnut bearing acreage reached record highs in 2001, as trees planted in the mid-nineties, in response to high grower prices, came into production. Hazelnut bearing acreage has been declining slowly over the past few years after peaking in 1998. The level in 2001, however, is still higher than any year prior to 1996. The declining pattern in hazelnut plantings may slow or even turn around in the next few years, if the U.S. industry's major competitor, Turkey, is successful in its policy of reducing the size of its hazelnut industry.

### **Prices Received by Growers Down in 2001**

The index of prices received by growers fell 6 percent in 2001 from the year earlier to 101, the same as in 1999. Prices were driven down by lower prices for some major crops, such as oranges, grapefruit, and lemons, as well as for most tree nuts. A 1-percent increase in the dried fruit producer price index reflects the lower price received by growers for prunes slightly offsetting the higher raisin prices. As a result of higher retail prices for some fruit, the Consumer Price Index (CPI) for fresh and processed fruit was also up in 2001. Consumers paid more at retail stores for bananas, Thompson seedless grapes, grapefruit, and navel oranges. These fruit are four of the top five fresh fruit consumed by Americans (excluding apples), driving the CPI to 265.1, up 3 percent. Retail prices were also higher for orange juice, one of the major processed fruit products.

### **Fruit Consumption Continues To Slide**

Fruit consumption fell in 2001 for the fourth consecutive year, reaching 279.1 pounds per person, fresh-weight equivalent, the lowest quantity since 1995.

Lower consumption, down 1 percent from 2000, was a result of tight supplies of most fruit and weak consumer demand for processed fruit products such as raisins and juices. Citrus consumption increased 4 percent to 113.7 pounds per person for the 2000/01 citrus season, mostly due to higher consumption of orange and lemon products, and grapefruit juice. Noncitrus consumption was at a 6-year low, averaging 165.4 pounds per person, 5 percent below the year earlier. Smaller crops of most noncitrus fruit, especially apples, grapes, and peaches, as well as a decline in banana imports, resulted in the decline. Tree nut consumption rose 6 percent to 2.5 pounds per person. A large proportion of the major tree nuts, such as almonds and walnuts are exported, and higher exports in 2001 over 2000 accounted for most of the usage of these very large crops in 2001.

***Fresh fruit:*** Fresh fruit consumption fell 3 percent in 2001 to 97.5 pounds per capita. Fresh citrus consumption increased 3 percent, with higher consumption of oranges, lemons, and limes than during the previous year. Tangerine consumption declined from the previous year's record, but consumption in 2001 ranked second behind 2000. Fresh grapefruit consumption continues its decline that began in 1997 and at 4.8 pounds per person, it was the lowest since 1990 and considerably below consumption in the seventies and eighties.

Fresh noncitrus consumption fell 5 percent from the year earlier. Americans consumed fewer bananas and apples, the top two fresh fruit eaten in the United States. Consumption was down for most other noncitrus fruit, but was above 2000 for avocados, cherries, grapes, mangos, papayas, and plums and prunes. The increase in fresh grapes, along with mangos and papayas, was fueled by higher imports. The United States relied heavily on imports of these items to boost their consumption. While imports were up in 2001 for these commodities, they fell for bananas to the lowest level since 1997, resulting in the decline in banana consumption. Weather and labor problems in the major banana-producing countries hindered shipments and increased retail prices. As a result, because of the heavy influence of bananas on fresh fruit consumption, overall fresh use fell. While there may have been some substitution, it was not sufficient to offset the strong reliance on bananas by Americans.

***Canned fruit:*** Canned fruit consumption increased 2 percent in 2001 from the year earlier to an annual average of 15.6 pounds per person. On a per capita basis, Americans ate more canned apples, olives, and

pears. While canned olive imports fell slightly in 2001, supply was more than made up for by a large crop. Because inventory data are not available for canned fruit, the consumption data reflect an on- and off-year cycle, reflecting some of the alternate-bearing nature of some of the fruit trees and the storage of oversupply for use the following year. When examined using a 2-year average to compensate for this alternating tendency, canned fruit consumption fell overall by 3 percent, but remained unchanged for peaches, the major canned fruit consumed. When examined in this fashion, canned olive consumption actually fell from the previous 2-year period, 1998/99 and 1999/2000. However, 2000/01 data include unusually low production and offset the numbers. Therefore, it is really impossible to see any trend occurring in recent years.

**Frozen fruit:** While Americans consume only small amounts of frozen fruit, compared with fresh, canned, or juiced, consumption in 2001 averaged 4 pounds per capita, the highest on record. Consumers may be becoming more aware of the benefits of frozen fruit, with similar nutrient values as fresh. The increase is likely also driven by media information produced by different berry industries on their health benefits, particularly of blueberries and raspberries. Frozen berries account for over half of all frozen fruit consumption. Among the frozen berries, strawberries are the largest category. In 2001, frozen strawberry consumption remained level with the previous year at an average of 1.6 pounds per person.

The pack and imports were down in 2001, however, large carryover stocks from the record-large crop the previous year, provided enough supplies to maintain the level of consumption. Frozen blueberry pack was also down in 2001, but an increase in imports as well as high beginning stocks brought overall per capita consumption up to 0.35 pound. Demand for blueberries internationally is directly competing with domestic demand and holding consumption below early- to mid-nineties levels. Frozen cherry consumption was slightly higher in 2001, increasing to 0.56 pound per person. While consumption of frozen sweet cherries fell, tart cherry levels were higher because of a big crop. The larger crop, however, only had a small impact on increasing consumption, and the industry was left with large inventories at the end of the season.

**Dried fruit:** Dried fruit consumption fell 2 percent in 2001 from 2000 to an average of 2.4 pounds per person. Much of the decline can be attributed to a drop in raisin consumption, which accounted for 61 percent of

all dried fruit usage. In 2001, raisin consumption fell 3 percent to 1.5 pounds per person, the lowest level since 1979/80. A smaller grape crop in 2001 and strong competition for Thompson seedless grapes for other uses, especially the fresh-market and other higher-valued processed products, reduced raisin production. Despite large inventories at the beginning of the season, consumer interest in raisins was not strong and consumption fell. Prune use also declined in 2001, as did the consumption of figs and dried apricots. Only the consumption of dried apples and dates was higher than the previous year.

**Fruit juice:** Fruit juice consumption declined for the second straight year to an annual average of 8.4 gallons per person. Usage in 2001/02 was 2 percent lower than the previous year and 11 percent below the record-high set in 1999/2000. Lower production of most fruit used to make juice contributed to the decline in consumption. Consumers increased use of only pineapple and prune. Orange juice consumption remained unchanged from last season at 5.2 gallons per person. Despite higher production and record high beginning stocks coming into the 2001/02 season, lower imports and record high exports held down the quantity available for domestic consumption. Stronger movement of frozen concentrated orange juice during the season over a year ago offset sluggish movement in the not-from-concentrate (NFC) orange juice, despite lower NFC retail prices.

Increased imports helped boost availability and consumption of pineapple juice in 2001/02 to 0.31 gallon per person, slightly above last year. High imports, however, were insufficient to boost apple juice supplies with production at its lowest level since 1988/89. As a result, apple juice per capita consumption fell 2 percent to 1.8 gallons. Without the availability of stock data, however, it is difficult to truly estimate consumption of these two juices.

The procedure used by the Economic Research Service to calculate grapefruit juice consumption was altered this year, to more accurately reflect industry inventory data. The new procedure for calculating beginning and ending stocks uses data from the Florida Citrus Processors Association and is also used for the orange juice supply and utilization table. This procedure may slightly underestimate storage outside of Florida and by nonmembers of the association. Since we assume outside storage to be small relative to member storage, we believe the new procedure more accurately reflects grapefruit juice use. Changes were made back to 1989/90, making compar-

isons in the series more accurate if examined from that point on. Grapefruit juice consumption fell 16 percent in 2001/02 from the previous year.

**Tree nuts:** Tree nut consumption, at an average of 2.9 pounds per person in 2001/02, reached its highest level, and was 31 percent higher than last season and 15 percent above the second highest level in 1999/2000. Big crops this season contributed partially to the increase. A 47-percent increase in imported nuts, such as cashews, Brazil nuts, and pine nuts, shows an overall increase in American demand for nuts. Also pointing to stronger consumer demand is that ending stocks for all tree nuts were only 5 percent above last season, even though domestic production was 20 per-

cent above a season ago. The U.S. tree nut industry is generally heavily reliant on export markets, and 7 percent higher exports also helped moderate the ending stock increase.

U.S. consumption of almonds increased 80 percent in 2001/02, due to a record crop size and lower exports. Very strong domestic demand for almonds resulted in exports falling 9 percent and brought ending stock levels to their lowest since 1996/97. With the strong domestic demand, consumption reached 1.0 pound per person in 2001/02, a record high. Americans also consumed more pecans and hazelnuts. Consumption, however, was down for walnuts, macadamia nuts, and pistachios.

## List of Tables

### GENERAL

A-1. U.S. per capita use of selected, commercially produced, fresh, and processed fruit and tree nuts, 1976 to date .....	12
A-2. Bearing acreage for fruit and tree nuts, United States, 1980 to date .....	15
A-3. Utilized production and value of production of citrus and noncitrus fruit, United States, 1980 to date .....	15
A-4. Bearing acreage for selected citrus and noncitrus fruit, United States, 1980 to date .....	16
A-5. Total commercial production for selected citrus and noncitrus fruit, United States 1980 to date .....	17
A-6. Average price indexes for fruit, United States, 1980 to date .....	18
A-7. Annual average retail prices for selected fresh fruit, United States, 1980 to date .....	18
A-8. Fruit and tree nuts: U.S. cash receipts, 1980 to date .....	19
A-9. Fresh apples: U.S. monthly average retail prices, marketing spread, and grower price, 1989 to date .....	20
A-10. Fresh peaches: U.S. monthly average retail price, marketing spread, and grower price, 1989 to date .....	20
A-11. Fresh pears: U.S. monthly average retail price, marketing spread, and grower price, 1989 to date .....	21
A-12. Fresh grapes: U.S. monthly average retail price, marketing spread, and grower price, 1995 to date .....	21
A-13. Fresh strawberries: U.S. monthly average retail price, marketing spread, and grower price, 1989 to date .....	22
A-14. Fresh oranges: U.S. monthly average retail price, marketing spread, and grower price, 1989 to date .....	22
A-15. Fresh grapefruit: U.S. monthly average retail price, marketing spread, and grower price, 1989 to date .....	23
A-16. Fresh lemons: U.S. monthly average retail prices, marketing spread, and grower price, 1989 to date .....	23
A-17. Fruit and tree nut production in leading countries and the world, 1998 to date .....	24

### NONCITRUS FRUIT

#### General:

B-1. Utilization of noncitrus fruit production and value, United States, 1980 to date .....	29
B-2. Fruit, frozen: Commercial pack, United States, 1980 to date .....	30
B-3. Fruit, dried: Production (dry basis), California, 1980 to date .....	31

#### Apples:

B-4. Apples: Production, utilization, and season-average grower price, United States, 1980 to date .....	31
B-5. Apples, fresh: Monthly prices received by growers, United States, 1980 to date .....	32
B-6. Apples, Red Delicious, fresh: Monthly retail prices, United States, 1980 to date .....	32
B-7. Apples: Processed utilization and season-average grower price, United States, 1980 to date .....	33

#### Apricots:

B-8. Apricots: Production, utilization, and season-average grower price, United States, 1980 to date .....	33
--	----

<b>Avocados:</b>	
B-9. Avocados: Production, season-average grower price, and value, by State, 1980/81 to date .....	34
<b>Bananas:</b>	
B-10. Bananas: Number of farms, acreage, production, price, and value, Hawaii, 1980 to date .....	34
<b>Cherries:</b>	
B-11. Cherries, sweet: Production, utilization, and season-average grower price, United States, 1980 to date .....	35
B-12. Cherries, tart: Production, utilization, and season-average grower price, United States, 1980 to date .....	35
<b>Figs:</b>	
B-13. Figs: Production, utilization, and season-average grower price, California, 1980 to date .....	36
<b>Grapes:</b>	
B-14. Grapes: Production, utilization, and season-average grower price, United States, 1980 to date .....	36
B-15. Grapes: Production and season-average grower price, California, 1980 to date .....	37
B-16. Grapes: Processed utilization and season-average grower price, United States, 1980 to date .....	37
<b>Guavas:</b>	
B-17. Guavas: Total processed, farm production, price, and value, Hawaii, 1980 to date .....	38
<b>Kiwifruit:</b>	
B-18. Kiwifruit: Acreage, production, season-average grower price, and value, California, 1980 to date ..	38
<b>Mangos:</b>	
B-19. Mangos: Acreage, bearing trees, production, season-average grower price, and value, Florida, 1980 to date .....	39
<b>Nectarines:</b>	
B-20. Nectarines: Production, utilization, and season-average grower price, California, 1980 to date .....	39
<b>Olives:</b>	
B-21. Olives: Bearing acreage, production, utilization, season-average grower price, and value, California, 1980 to date .....	40
<b>Papayas:</b>	
B-22. Papayas: Acreage, yield per acre, production, utilization, and season-average grower price, Hawaii, 1980 to date .....	40
<b>Peaches:</b>	
B-23. Peaches: Production, utilization, and season-average grower price, United States, 1980 to date .....	41
B-24. Peaches, fresh: Monthly prices received by growers, United States, 1980 to date .....	41
B-25. Peaches: Processed utilization, and season-average grower price, United States, 1980 to date .....	42
<b>Pears:</b>	
B-26. All pears: Production, utilization, and season-average grower price, United States, 1980 to date ..	42
B-27. Bartlett pears: Production, utilization, and season-average grower price, United States, 1980 to date .....	43
B-28. Pears, fresh: Monthly prices received by growers, United States, 1980 to date .....	43
<b>Pineapples:</b>	
B-29. Pineapples: Number of farms, acreage, production, disposition, price, and value, Hawaii, 1980 to date .....	44

**Plums and prunes:**

B-30. Plums: Acreage, production, season-average grower price, and value, California, 1980 to date . . . . .	44
B-31. Prunes (dried basis): Acreage, production, season-average grower price, and value, California, 1980 to date . . . . .	45
B-32. Prunes and plums: Production, utilization, and season-average grower price, four States, 1980 to date . . . . .	45

**CITRUS FRUIT****Grapefruit:**

C-1. Grapefruit: Bearing acreage and yield per acre, by State, 1980/81 to date . . . . .	46
C-2. Grapefruit: Production, by State, 1980/81 to date . . . . .	46
C-3. Grapefruit: Utilization of production, by State, 1980/81 to date . . . . .	47
C-4. Grapefruit: Equivalent-on-tree returns, by State, 1980/81 to date . . . . .	47
C-5. All grapefruit: Monthly equivalent-on-tree returns received by growers, Arizona, 1980/81 to date . .	48
C-6. All grapefruit: Monthly equivalent-on-tree returns received by growers, California, 1980/81 to date .	48
C-7. All grapefruit: Monthly equivalent-on-tree returns received by growers, Florida, 1980/81 to date . .	49
C-8. All grapefruit: Monthly equivalent-on-tree returns received by growers, Texas, 1980/81 to date . . .	49
C-9. All grapefruit: Monthly equivalent-on-tree returns received by growers, United States, 1980/81 to date . . . . .	50
C-10. Grapefruit processed, Florida, 1980/81 to date . . . . .	50
C-11. Frozen concentrated grapefruit juice: Canners' stocks, pack, supplies, and movement, Florida, 1980/81 to date . . . . .	51

**Lemons:**

C-12. Lemons: Acreage, yield per acre, and production, by State, 1980/81 to date . . . . .	51
C-13. Lemons: Utilization of production, by State, 1980/81 to date . . . . .	52

## **BERRIES**

### **Blackberries:**

D-1. Blackberries: Commercial acreage, yield per acre, production, and season-average grower price, Oregon and Washington, 1980 to date .....	61
--	----

### **Blueberries:**

D-2. Blueberries: Commercial acreage, yield per acre, production, and season-average grower price, by State, various years to date .....	62
---	----

### **Boysenberries and loganberries:**

D-3. Boysenberries and loganberries: Commercial acreage, yield per acre, production, and season-average grower price, California and Oregon, various years to date .....	66
---	----

### **Black raspberries:**

D-4. Black raspberries: Commercial acreage, yield per acre, production, and season-average grower price, Oregon and Washington, 1980 to date .....	68
---	----

### **Red raspberries:**

D-5. Red raspberries: Commercial acreage, yield per acre, production, and season-average grower price, Oregon and Washington, 1980 to date .....	69
---	----

### **Cranberries:**

D-6. Cranberries: Acreage harvested, yield per acre, production, utilization, season-average grower price, and value, United States, 1980 to date .....	70
--	----

### **Strawberries:**

D-7. Strawberries: Acreage, production, season-average grower price, and value, United States, 1980 to date .....	70
D-8. Strawberries, fresh market and processing: Production, season-average grower price, and value, United States, 1980 to date .....	71
D-9. Strawberries, fresh: Monthly prices received by growers, United States, 1980 to date .....	71

## **TREE NUTS**

### **General:**

E-1. All tree nuts: Bearing acreage, United States, 1980/81 to date .....	72
E-2. All tree nuts: Gross return per bearing acre, United States, 1980/81 to date .....	72
E-3. All tree nuts: Utilized production (shelled basis), United States, 1980/81 to date .....	73
E-4. All tree nuts: Season-average grower prices received, United States, 1980/81 to date .....	73
E-5. All tree nuts: Value of production, United States, 1980/81 to date .....	74
E-6. All tree nuts (shelled basis): Supply and utilization, United States, 1980/81 to date .....	74

**Almonds:**

E-7. Almonds: Acreage, yield per acre, production (shelled basis), season-average grower price, and value, California, 1980 to date .....	75
E-8. Almonds: Supply and utilization (shelled basis), 1980/81 to date .....	75

**Hazelnuts:**

E-9. Hazelnuts (filberts): Bearing acreage and yield per acre (in-shell), by State, 1980 to date .....	76
E-10. Hazelnuts (filberts): Production (in-shell), season-average grower price, and value, by State, 1980 to date .....	76
E-11. Hazelnuts (filberts): Supply and utilization (shelled basis), 1980/81 to date .....	77

**Macadamia nuts:**

E-12. Macadamia nuts: Acreage, yield per acre, production (in-shell), season-average grower price, and value, Hawaii, 1980 to date .....	77
--	----

**Pecans:**

E-13. Pecans: Production (in-shell), season-average grower price, and value, United States, 1980 to date ..	78
E-14. Pecans: Supply and utilization (shelled basis), 1980/81 to date .....	78

**Pistachios:**

E-15. Pistachios: Production (in-shell), season-average grower price, and value, California, 1980 to date ..	79
E-16. Pistachios: Supply and utilization (shelled basis), 1980/81 to date .....	79

**Walnuts:**

E-17. Walnuts (English): Production (in-shell), season-average grower price, and value, California, 1980 to date .....	80
E-18. Walnuts: Supply and utilization (shelled basis), 1980/81 to date .....	80

## **PER CAPITA CONSUMPTION**

F-1. Fresh apples: Supply and utilization, 1980/81 to date .....	81
F-2. Fresh bananas: Supply and utilization, 1980 to date .....	81
F-3. Fresh grapes: Supply and utilization, 1980/81 to date .....	82
F-4. Fresh kiwifruit: Supply and utilization, 1985 to date .....	82
F-5. Fresh mangos: Supply and utilization, 1980 to date .....	83
F-6. Fresh papayas: Supply and utilization, 1980 to date .....	83
F-7. Fresh peaches and nectarines: Supply and utilization, 1980 to date .....	84
F-8. Fresh pears: Supply and utilization, 1980/81 to date .....	84
F-9. Fresh strawberries: Supply and utilization, 1980 to date .....	85
F-10. Fresh grapefruit: Supply and utilization, 1980/81 to date .....	85
F-11. Fresh lemons: Supply and utilization, 1980/81 to date .....	86
F-12. Fresh limes: Supply and utilization, 1980/81 to date .....	86
F-13. Fresh oranges: Supply and utilization, 1980/81 to date .....	87
F-14. Canned apples: Supply and utilization, 1980/81 to date .....	87
F-15. Canned apricots: Supply and utilization, 1980/81 to date .....	88
F-16. Canned cherries, sweet: Supply and utilization, 1980/81 to date .....	88
F-17. Canned cherries, tart: Supply and utilization, 1980/81 to date .....	89
F-18. Canned olives: Supply and utilization, 1980/81 to date .....	89

F-19. Canned peaches: Supply and utilization, 1980/81 to date .....	90
F-20. Canned pears: Supply and utilization, 1980/81 to date .....	90
F-21. Canned pineapples: Supply and utilization, processed-weight basis, 1980 to date .....	91
F-22. Canned plums: Supply and utilization, 1980/81 to date .....	91
F-23. Apple juice and cider: Supply and utilization, 1980/81 to date .....	92
F-24. Grapefruit juice: Supply and utilization, 1980/81 to date .....	92
F-25. Orange juice: Supply and utilization, 1985/86 to date .....	93
F-26. Pineapple juice: Supply and utilization, 1980 to date .....	93
F-27. Dried prunes: Supply and utilization, 1980/81 to date .....	94
F-28. Dried raisins: Supply and utilization, 1980/81 to date .....	94
F-29. Fresh fruit: Per capita consumption, 1980 to date .....	95
F-30. Canned fruit: Per capita consumption, product-weight basis, 1980/81 to date .....	96
F-31. Frozen fruit: Per capita consumption, product-weight basis, 1980 to date .....	96
F-32. Dried fruit: Per capita consumption, product-weight basis, 1980/81 to date .....	97
F-33. Selected fruit juices: Per capita consumption, 1980/81 to date .....	97
F-34. Apples: Per capita utilization adjusted for imports and exports, fresh-weight equivalent, by product, 1980/81 to date .....	98
F-35. Grapes: Per capita utilization adjusted for imports and exports, fresh-weight equivalent, by product, 1980/81 to date .....	98
F-36. Total U.S. population .....	99
F-37. Fresh and processed fruit: Per capita utilization adjusted for imports and exports, fresh-weight equivalent, 1980 to date .....	99
F-38. Per capita consumption of selected noncitrus fruit, fresh-weight equivalent, 1980/81 to date .....	100
F-39. Per capita consumption of citrus fruit, fresh-weight equivalent, 1980/81 to date .....	101
F-40. Selected fruit: Per capita consumption, fresh-weight equivalent, 1980 to date .....	102
F-41. Tree nuts (shelled basis): Per capita consumption, 1980/81 to date .....	102

## TRADE

### **General:**

G-1. Volume of U.S. imports of selected commodities from top countries, 1992-2001 .....	103
G-2. Volume of U.S. exports of selected commodities to top countries, 1992-2001 .....	108

### **Fruit:**

G-3. U.S. fresh-market fruit imports, monthly, 2001 .....	112
G-4. U.S. fresh-market fruit imports, monthly, 2000 .....	113
G-5. U.S. fresh-market fruit imports, monthly, 1999 .....	114
G-6. U.S. fresh-market fruit exports, monthly, 2001 .....	115
G-7. U.S. fresh-market fruit exports, monthly, 2000 .....	116
G-8. U.S. fresh-market fruit exports, monthly, 1999 .....	117

### **Fruit juice:**

G-9. U.S. fruit juice trade, monthly, 2001 .....	118
G-10. U.S. fruit juice trade, monthly, 2000 .....	119
G-11. U.S. fruit juice trade, monthly, 1999 .....	119

Table A-1--U.S. per capita use of selected, commercially produced, fresh, and processed fruit and tree nuts, 1976 to date 1/

Crop	1976	1977	1978	1979	1980	1981	1982	1983	1984

1/ Data may not match other tables due to rounding. Year reflects end of harvest for citrus and beginning year of harvest for noncitrus. 2/ Includes tangerines, tangelos, other mandarins, and limes. 3/ Includes nectarines. 4/ Includes small quantities of dried and other processed products.

5/ Includes apricots, cranberries, kiwifruit, mangos, papayas, and plums and prunes. 6/ Includes apricots and plums and prunes. 7/ Includes blackberries, blueberries, raspberries, boysenberries, loganberries, and apricots. 8/ Includes prunes and cranberries. Estimates for cranberries began in 1989.

9/ Includes apricots, dates, figs, peaches, and plums and prunes. 10/ Shelled basis. 11/ Includes hazelnuts, macadamias, pistachios, Brazil nuts, cashews, and mixed nuts.

1/ National Agricultural Statistics Service (NASS) began reporting "limited" and "undersized" as separate categories in 1990 and made estimates for 1988 and 1989. All data since 1988 are as reported by NASS. 2/ Mostly canned, except for 1980 when use of limited-size fruit in canned ripe olives was not permitted. Reported by California Olive Committee for 1976 to 1987. 3/ "Limited and undersized" reported by NASS, minus "limited size" reported by California Olive Committee for 1976 to 1987. Includes undersized and culs.

N.A.= Not available. 1/ Small quantities of processed blueberries are included in fresh to avoid disclosure of individual operations. 2/ Maine produces wild blueberries, other States cultivated. NASS publishes data for cultivated blueberries only. Beginning in 1988, data are from the New England Agricultural Statistics Service. Data prior to 1988 are from the North American Blueberry Council. 3/ Includes small amounts from Indiana prior to 1992.

Sources: New England Agricultural Statistics Service, Oregon Agricultural Statistics Service, Oregon Dept. of Agriculture; Washington Agricultural Statistics Service, State of Washington Dept. of Agriculture; North American Blueberry Council; National Agricultural Statistics Service, USDA.

## Visit the ERS Website

**A completely redesigned, re-engineered ERS website.** Users will find timely, comprehensive economic analysis on agriculture, food, the environment, and rural development, presented in a streamlined format with enhanced information and features.

- leaf **More user-friendly navigation.** Find exactly what you need more easily and quickly.
- leaf **A powerful search engine.** Search by topic, or use an advanced search feature for more specific information.
- leaf **Enhanced features and services.** Easily locate upcoming events and publications, ERS experts, and new and newsworthy ERS research products. Customize your ERS e-mail subscriptions.
- leaf **Syntheses of specific ERS research.** Visit briefing rooms for an in-depth, synthesized discussion of ERS research on a wide range of individual topics, along with access to publications, data, and related information sources.
- leaf **Easily accessible data.** Access data re-engineered for ease of location and use; databases on major commodities and trade allow users to retrieve data by commodity, country, and time period.

More...

Find a wealth of economic analysis on issues ranging from the World Trade Organization...to farm business concerns such as risk management and farm structure...to food safety, environmental policies, and the economy of rural America.
